

Experimental parent: mouse GSDMD

PDB 6N9N · chain A · X-ray, 3.30 Å

SHARED N-TERMINUS

Residues 1-73; 69 observed in parent chain A

Gray: remainder of experimental parent

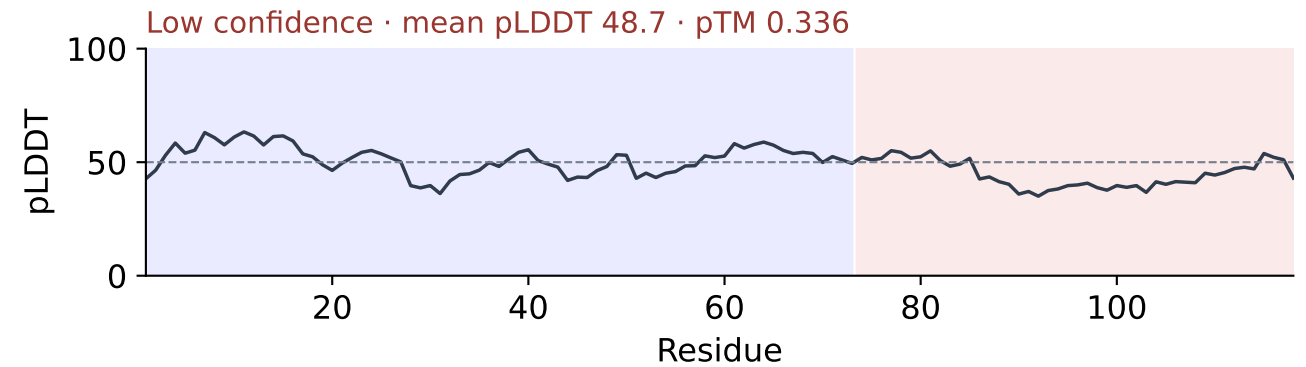

Missing parent residues are not modeled.

Gsdmd:Tmem106a · 118 aa

Boltz2 prediction of a reference reconstruction

Red: novel out-of-frame tail, residues 74-118

Experimental parent and predicted chimera are separate structures. Prediction does not establish fold, function or druggability.
